Tim,
Know anything about the
new mushroom?

I remember you also mentioned
new compounds when you
were still in Switzerland.

Be glad to hear
about them

I wrote Jerry Brown
recently & told him

to read Exo-Psyche
& get together
with you - even
if it had to be in
the desert at night
if it was a
matter of ph. mag

— would therefore assume
that you have not heard
from his office... interesting
to see the Newsweek
article on him pushing
space. He seems a
little fuzzy for presidential
status — but maybe the
non-presidential figure is
the coming flick.

You may be hearing
from Merion in N.C. for
a lecture at the college
there.

Love on
Med
